### Define Problem Statements :

**Introduction:** StudyAI is an AI-powered personalized learning platform designed to solve one of the most common challenges faced by college students the inability to efficiently process and revise large volumes of study material before exams. Students today are overwhelmed with textbooks, lecture notes

**Solution Approach:** StudyAI addresses these problems by allowing students to upload any study material in PDF, DOCX, or TXT format. The platform then uses Groq's Llama 3.3 70B AI model to automatically generate structured summaries, flashcards, MCQ quizzes, True/False questions, and Short Answer questions within seconds. Additionally, the platform provides a weak topic analyzer that identifies areas where the student needs improvement based on quiz performance, and a personalized 7-day study schedule generator where students plan their revision systematically.

### Example:

| Problem Statement (PS) | I am                                                  | I'm trying to                                                 | But                                                         | Because                                                                  | Which makes me feel                                           |
|------------------------|-------------------------------------------------------|---------------------------------------------------------------|-------------------------------------------------------------|--------------------------------------------------------------------------|---------------------------------------------------------------|
| PS-1                   | A college student preparing for exams.                | Quickly understand and revise large volumes of study material | I don't have enough time to read everything manually.       | There is no tool that automatically summarizes documents for me.         | Overwhelmed and anxious about exam preparation.               |
| PS-2                   | A college student who wants to practice before exams. | Test my knowledge with quiz questions from my study material. | I have to manually search for or create practice questions. | No platform auto-generates quizzes from my own uploaded notes.           | Frustrated and underprepared for exams.                       |
| PS-3                   | A college student studying with flashcards.           | Create flashcards quickly from my lecture notes.              | Making flashcards manually takes too much time.             | There is no tool that automatically generates flashcards from documents. | Demotivated and unable to practice active recall effectively. |
