

Communication

Date	10 July 2026
Team ID	
Project Name	StudyAI-Smart AI educate Companion&Quiz Generator
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Personal notes/GitHub commits	Self	Track daily tasks completed and plan next steps
2	Progress Update	Weekly	Google Meet/Email	Self + mentor	Get feedback on progress against sprint plan
3	Issue / Bug Discussion	As Needed	GitHub Issues	Self	Log and resolve bugs during development
4	Stakeholder Review	Bi-Weekly	Google Meet/Presentation	Self + mentor	Present current build, gather feedback on features and UI
5	Final Demo Rehearsal	Once	Solo run-through/recorded practice	Self	Practice full walkthrough before final presentation
6	Documentation Updates	As Needed	GitHub README	Self	Keep setup instructions and feature list current as project evolved

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	No teammates to bounce ideas off or catch mistakes early	Relied on mentor check-ins and self-review checklists before each milestone
2	Balancing full ownership of frontend, backend, and AI integration alone	Broke work into clear sprints (as per Project Planning phase) to stay organized and avoid overload
3	Debugging deployment issues without a second pair of eyes	Documented each issue and fix in commit messages/notes for future reference, and used browser DevTools + Render logs systematically to isolate problems
